

# Your Garden Plan Grid

Feel Free to download and print this PDF for your convenience.

With the help of the [Florida Yearly Planting Schedule](#) and [Seed Starting Chart](#), decide what you are going to grow and when you want to grow. Once you have done that, use the grid below to draw out what you are going to plant in each area.

You can also use grid paper or draw one to the size of your garden. This grid is based on a rectangle (4"x8") and represents a 4' x 8' foot plot. The grid is comprised of 1" squares.

Each 1" square = 1 square foot.
